OS02/13 0:000 CST 0 Heavy Snow OS02/13 15:00 CST 0 DHEAVY SNOW DEATH TO STORE THE ACT OF	(IA-Z008) MITCHELL. (IA-Z018) FLOYD				
Anarrow but intense band of snow set up across portions of northeast lowa during the exeming hours of May 1st and continued into the 2nd. While most of northeast lowa ended up receiving some anow from this system, a band of 10 inches or more occurred across portions of Floyd and Mitchell Counties. New lowa state snowfall records for the month of May were established with a two day total of 13 inches on May 2nd and and in Calego (Michell County). This also established an ever record for the amount of amount ost lat during the entire month of May, Other notable snowfall totals were 10 inches in Charles City (Floyd County). The heavy wet snow caused power outsides with \$5000 customers across northern lowa losing power. Runoff from heavy rain pushed the Upper lowa River out of its banks near Dorchester. The river crested almost four feet above the flood stage at 15.86 feet.

Several rounds of thunderstorms rolled across northeast lowa during the afternoon and evening of May 19th. These storms produced very heavy rains across Floyd and Mitchell Counties where numerous roads were washed out or covered with flood waters. Damage to roads in Mitchell County was estimated to be around \$4.5 million where 22 roads were closed with 6 to 8 bridges washed out. The heavy rain also damaged the corn crop in Mitchell County where it is estimated up to 15 percent of the crop will not grow back. The storms also produced damaging winds that destroyed buildings and blew down trees and power lines. Barns were blown down in Floyd and Mitchell Counties while a grain elevator was damaged near Fredericksburg (Chickasaw County). Flood waters on the Little Cedar River east of Charles City (Floyd County) damaged a railroad bridge causing an 80 car train to derail into the river. The two employees on the

Location Date/Time Deaths & Property & Event Type and Details Injuries Crop Dmg

Multiple round of thunderstorms moved across northeast lowa during the afternoon and evening of May 31st. These storms developed in a complex surface pattern across the Upper Midwest as a pre-frontal surface trough, dry line and cold front all passed through the area. A small tornado touched down north of Floyd (Floyd County) and quarter sized hail fell in St. Ansgar (Mitchell County), otherwise, the storms passed through without producing much severe weather.

MINNESOTA, Southeast

The automated mesonet reporting equipment in Dover reported 2.52 inches of rain.

The river crested a foot and a half above the flood stage at 16.52 feet. Several rounds of thunderstorms rolled across southeast Minnesota during the afternoon and evening of May 19th. The first round of storms produced wind damage from the northeast corner of Mower County into Winona and Wabasha Counties during the afternoon. The second round of storms produced additional wind damage across primarily Winona County later that evening. In addition, the heavy rain from these repeated storms caused flash flooding to occur near Le Roy and Adams (Mower County) as water from streams flowed over several roads that prompted sandbagging. Other flash flooding near Rose Creek (Mower County) caused significant flooding at a campground.

JACKSON COUNTY 2.4 NW MERRILLAN 144				
JACKSON COUNTY 2.4 NW MERRILLAN [44	05/31/13 19:44 CST		0	Funnel Cloud

A funnel cloud was spotted northwest of Merrillan.

Multiple rounds of thunderstorms moved across western Wisconsin during the afternoon and evening of May 31st. These storms developed in a complex surface pattern across the Upper Midwest as a pre-frontal surface trough, dry line and cold front all passed through the area. The storms primarily produced large hail, although a funnel cloud was sighted near Merrillan (Jackson County). The largest hail reported was half dollar sized near Independence (Trempealeau County).
